# STIC EIC 3600 Search Request Form

Today's Date: July 5, 2007 Class/Subclass: 705/26 What date would you like to use to limit the search? Priority Date: 10/22/99 Other: \_\_\_\_\_

Name: Andrew Rudy  
AU: 3627 Examiner #: 79151  
Room #: KNX 5B09 Phone: 2-6789  
Serial #: 09/426063

## Format for Search Results (Circle One):

PAPER DISK EMAIL

## Where have you searched so far?

USP DWPI EPO JPO ACM IBM TDB  
IEEE INSPEC SPI Other \_\_\_\_\_

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

see attached claims.  
In particular: notifying seller when the buying criteria  
does not match the seller criteria.

# STIC Search Results Feedback Form

**EIC 3600**

Questions about the scope or the results of the search? Contact *the EIC searcher or contact:*

**Karen Lehman, EIC 3600 Team Leader**  
**(571) 272-3496 Knox 4B68**

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

*Types of relevant prior art found:*

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

**Drop off or send completed forms to EIC3600/Knox 4B68**

...TEXT: to suppliers.

To eliminate mismatches among purchase orders, invoices, and receiving documents, KPSC requested electronic price catalogs from its key suppliers. EDI price catalog updates, transmitted in the X12 832 standard, are used to ensure that both buyers and sellers have matching prices in their systems so that all related transactions reference the same price.

It is estimated that up to 33 percent of all mismatches can be eliminated through use of the 832 standard. KPSC, for example, discovered that a key supplier was incorrectly reporting products as taxable. This mismatch resulted in sales ...20 percent of all invoices and related check payments, KPSC targeted procurement cards for many purchases. The administrative cost of maintaining vendor files, documenting invoice approval, and cutting checks for small...

Capture and communicate value in the pricing of services  
Berry, Leonard L; Yadav, Manjit S  
Sloan Management Review v37n4 PP: 41-51 Summer 1996  
ISSN: 0019-848X JRNL CODE: SMZ  
WORD COUNT: 7548

...TEXT: INDUSTRIES BECAUSE TOO MANY SERVICES MARKETERS IGNORE THE SPECIAL CHAL

Headnote: lenges of pricing intangible products. The authors discuss the implications of this kind of pricing in today's highly competitive...

...offer a framework that reconciles the implications with customers' quest for value. Three distinct but related strategies for services pricing -- satisfaction-based pricing, relationship pricing, and efficiency pricing - can help services marketers capture and communicate value through their pricing.

The pricing of services in the United States is a mess. Consider these examples:  
In 1992, Congress enacted the...

...Act to rein in prices in the cable television industry. This legislation, prompted by widespread consumer dissatisfaction with price increases and poor service, gave broad regulatory powers to the Federal Communications Commission and local communities. Although the sweeping... benefit levels at different price levels. Movie theaters, for example, increase the value of their service by allowing customers to choose whether to pay a higher price for prime time or a lower price for non-prime time. Such segmented pricing also lets the movie theaters synchronize demand patterns with supply capacity without segmented pricing, more customers would go to the movies in the evening, and the facilities would be underutilized during the day. In order to price for value, services marketers must first understand what constitutes value for their target markets. Their goal then becomes capturing and communicating this value proposition - as clearly and compellingly as possible -- through the pricing. We suggest three distinct but related pricing strategies for capturing and communicating the value of a service: satisfaction-based relationship, and efficiency pricing. They can be used independently or in combination. (See nature of services challenges both company and customer to clearly establish the value of the service. Some uncertainty...

...TEXT: conformance to requirement

- \* The system--prevention;
- \* The performance standard--zero defects; and
- \* The measurement--the price of nonconformance.

In order to maximize conformance to retirements, FHP recognizes that management and employees must determine what the customer requirements are. Recognizing that management reports often represent a fraction of problems and improvement opportunities, they encourage employees to utilize a process to determine requirements:

- \* Input--ask the customer;
- \* Process--communicate these requirements to suppliers and service partners; and
- \* Output--measure the outcomes to determine satisfaction in meeting requirements.

The member services function of FHP serves to facilitate this interaction

with customers, while the plan administration area communicates with service partners, augmenting statistical management reports. Member satisfaction tracking studies and surveys serve not only to...

The impact of information technology on the organization of economic activity: The "move to the middle" hypothesis

Clemons, Eric K; Reddi, Sashidhar P; Row, Michael C

Journal of Management Information Systems: JMIS v10n2 PP: 9-35 Fall 1993

ISSN: 0742-1222 JRNL CODE: JMI

WORD COUNT: 12133

...TEXT: the efficiency of competition to reduce risk depends on comparability among suppliers--increasing differentiation of product offerings reduces this comparability, thus increasing the costs of search or reducing the benefits of...

...as increasing the level of differentiation of the product. Instead of being evaluated on simple price and physical product characteristics, a supplier must be evaluated on lead time, flexibility, reliability, innovation, and value-added services. The increasing complexity of the relevant product/service characteristics inherent in increasing explicit coordination increases the cost of search. Most economic models of search are based on fixed product characteristics from which a buyer must select. The bundle of product and service characteristics inherent under explicit coordination is very different: more aspects of service become important characteristics in the selection of a supplier. These service characteristics are critical and yet more difficult to specify. For example, a company may adopt a new manufacturing process that requires components to be...

Making Quality a Common Cause

Pence, J. L.

Quality v31n9 PP: 27-30 Sep 1992

ISSN: 0360-9936 JRNL CODE: QUA

WORD COUNT: 1747

...TEXT: several kinds of programs that seek to help ensure quality in the hardware and software products that client companies buy. These programs are based on five principles that incorporate a consensus of ideas from leading quality experts:

- \* Quality comes from prevention, not correction.
  - \* Quality conforms to valid requirements and user expectations.
  - \* The cost of poor quality should be minimized.
  - \* The supplier is responsible for product quality.
  - \* Suppliers must continuously improve their quality.
- Bellcore applies these principles within three interrelated programs: generic requirements, technical analysis, and quality surveillance.

In the generic-requirements program, Bellcore suppliers and users/customers advance and develop promising technological concepts that could serve the business strategies of the client companies. Bellcore's primary activity is to specify and publish technical references that document generic requirements for those technologies.

In the technical-analysis program, Bellcore may work with individual suppliers in the early stages of a product's development or deployment or

when significant changes are made in a product. A technical...

...choices. Following the research that has highlighted the importance of both product offer and supplier related characteristics, this article will employ both types of variables in the examination of Korean importers' perceptions...national origin on buyer perception of product attributes. One research effort which did focus on supplier selection criteria was conducted by Hakahsson and Wootz (1975). Their study of Swedish purchasing agents characterized supplier selection criteria as bid characteristics (e.g. product offer related variables such as price and quality) and supplier or exporter characteristics such as country of location, reputation and size. Country of origin was the most important criterion in situations where buyers were highly uncertain about purchasing inputs. Another country of origin study by Khanna (1986) addressed the difficulties faced by Indian exporters in promoting their products to foreign purchasing managers. As a result of importers' lack of information about Indian exporters...

PBX Systems: The Twenty-First Century Phone System

Ubois, Jeffrey

CFO: The Magazine for Chief Financial Officers v6n10 PP: 48-58 Oct 1990

ISSN: 8756-7113 JRNL CODE: CFO

...ABSTRACT: for itself over time through lower telephone and personnel costs, improved internal communications, and better service to customers. The technical issues involved in purchasing a new PBX and coordinating it with company operations and other systems could warrant hiring a consultant. An important step for all buyers is to clearly define the requirements for the new PBX. Developing a highly specific request for proposal (RFP) will clarify what is needed and is the key to effective negotiations with suppliers. The RFP should include requirements for interfaces to other phone-related services. PBX vendors offer such services as station message detail recording, automated call distribution, and TI interface.

KPMG: KPMG Announces the Availability of Its Rapid Return on Investment "R2i" Offering for Release 10.7 SmartClient Oracle Applications

September 29, 1997

Byline: Business/Technology Editors

Robert Finley

...such as company size, database size, number of end-users, number of sites and required service levels for availability (hours per day times number of days), reliability (percentage uptime and time...

...from a failure) and performance (response time and throughput). Working with each of these hardware vendors, KPMG matches client requirements to an existing pre-configured solution, or can specify a customized configuration. KPMG also provides TechAssist services to help clients install and operate their new Oracle Applications. With KPMG's TechAssist service to handle the myriad tasks necessary to install and support Oracle Applications, clients can focus on the business side of implementation. Throughout an implementation project...

... shows, trade associations seek to inform member firms of recent developments, promote the industry's products to the press, and lobby Congress on issues of interest to members.

Many associations collect and disseminate information about prices, sales, production, and customer's credit, in the form of market research and industry statistics. It is with the reporting of price data that trade associations flirt with violations of federal antitrust laws.

One of the most egregious incidents of coordinated price signaling occurred in the mid-1980s when the American Hardwood Manufacturers Association (AHMA) designed an elaborate price reporting program for member firms. The trade association collected and disseminated detailed data on sales, production, and pricing by individual firms. It required members to submit daily reports of sales and shipping data. It also required monthly production and inventory reports for a wide variety of products. The association explicitly required individual firms to submit current price lists at the beginning of...

... targetd, "qualified" audience; invitees commonly include businesses, government agencies, and institutional buyers who have common product and service needs. Exhibitors include manufacturers, wholesalers, industrial distributors, media representatives, and consultants within a defined industry. The general public is normally excluded. Thus, the trade show provides a close match between buyer requirements and seller offerings. And, as noted above, the trade show can often deliver this audience on a relatively low cost-per- contact basis.

Trade show activity has increased dramatically in recent years. The Trade Show Bureau estimates...

Customers get angry when tape prices don't match what they saw on the floor. Thus, making sure there is no gap is key to good customer service ; in fact, it's essential.

Integrating hand-held computer and radio frequency technology, retailers can ensure prices are consistent. Via radio frequency (RF), a hand-held computer can communicate with the base station attached to the point-of-sale (POS) controller. Workers can thus...

... on a significant affiliation;  
-- reassure the risk-averse consumer;  
-- identify niches and corresponding affiliations;  
-- help retailers build consumer allegiance.  
Using these characteristics, Hochstein concludes, a marketer can match a symbol to a product and/or service, and then develop the right promotional vehicle to deliver his or her message.

Most major retailers will match or beat their competitors' prices on advertised, in-stock merchandise. That means the bouncing Tigger will jump down to another store's price if you...

... call it their "price guarantee." Some don't call attention to it, but they'll match a competitor's price if customers ask. And some reward the astute comparison shopper by shaving even more off the lower price.

The Gazette contacted 11 major retailers on Wednesday, and store managers or company officials at every one said they meet or beat their competitors' prices. Retailers are rarely surprised at their competitors' prices, because they comparison-shop each others' stores weekly.

Many stores require that bargain hunters bring the competitor's ad with them. Most restrict the price guarantee to current, in-stock merchandise, and don't match such things as special financing, rebates, buy-one-get-one-free...

JAPAN'S CREATIVE MASH ROOM MATCHES BUYERS/SELLERS ON NET

ASIA PULSE

August 17, 1998

JOURNAL CODE: WAPL LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 115

OSAKA, Aug 17 Asia Pulse - Creative Mash Room Co. has started matching buyers with sellers on its Digital Price homepage (<http://www.bigpower.co.jp/price/>), company officials said. Buyers explain in detail what they are seeking, such as product name or model number, color, brand and price. The Digital Price service handles consumer electronics, automobiles, computers and outdoor equipment. When a buyer receives an offer from a seller, Creative Mash Room provides the potential buyer with the seller's contact number. Sellers must be registered members of the service.

The service is currently free of charge, but Creative Mash Room plans to start charging an annual...

...strategies that represent savings to the shopper.

workshops for grocers at this year's convention reported fierce competition for the food-shopper's dollar. To offer consumers values comparable to those offered by warehouse clubs and mass merchants that sell groceries, supermarkets are lowering prices, offering discounts on specially packaged products and developing lines of value-oriented, private label products. Competition and economics are changing the food industry at all levels, and this change may result in long-term, price-related benefits for the shopper.

Price and competition shared space with health and nutrition as dominant themes at this year's convention.

According to FMI's 1992 TREND Report of Consumer Attitudes and the Supermarket, consumer interest in nutrition is at an all-time...

... occur in several ways. A retailer may give shelf prominence to its own private label product, to the detriment of the branded product, thereby enhancing its power by "shielding" the branded product while promoting its own label. Or a retailer might lower the prices of its private label products to correspond to a drop in the price of other brands, allowing the retailer to sustain a price differential below the branded product's price. Because the need for coordination and timing forces manufacturers to communicate their promotional programs and pricing information to retailers months in advance, private label retailers are able to plan their "shielding" activities. This gives them an unfair competitive advantage over other manufacturers.

Private label products also may obscure consumer price comparisons. Prices for well-known brands can be used by consumers as a measure of retailer competitiveness. In contrast, private label prices are not as directly comparable, largely because of differences in product quality, taste, appearance, or other factors. These same factors make it difficult for consumers to...

... s sole purpose for being. Through seminars, publications, and trade shows, trade associations seek to inform member firms of recent developments, promote the industry's products to the press, and lobby Congress on issues of interest to members.

Many associations collect and disseminate information about prices, sales, production, and customer's credit, in the form of market research and industry statistics. It is with the reporting of price data that trade associations flirt with violations of federal antitrust laws.

One of the most egregious incidents of coordinated price signaling occurred in the mid-1980s when the American Hardwood Manufacturers Association (AHMA) designed an elaborate price reporting program for member firms. The trade association collected and disseminated detailed data on sales, production, and pricing by individual firms. It required members to submit daily reports of sales and shipping data. It also required monthly production and inventory reports for a wide variety of products. The association explicitly required individual firms to submit current price lists at the beginning of...

... targetd, "qualified" audience; invitees commonly include businesses, government agencies, and institutional buyers who have common product and service needs. Exhibitors include manufacturers, wholesalers, industrial distributors, media representatives, and consultants within a defined industry. The general public is normally excluded. Thus, the trade show provides a close match between buyer requirements and seller offerings. And, as noted above, the trade show can often deliver this audience on a relatively low cost-per- contact basis.

Trade show activity has increased dramatically in recent years. The Trade Show Bureau estimates...

...Abstract: a customer-supplier relationship in the information technology market, we illustrate the complexities of vertical coordination processes. We focus on the strategic and organizational criteria that suppliers and customers must design in order to favour interaction between their heterogeneous competencies. In the examined case, the supplier provides general purpose knowledge to be utilized and enriched through the contact with, and fertilization by, application abilities available at the customer level.

INFORMATION AND EFFICIENCY IN MARKETS (LIQUIDITY TRADERS, COSTLY SEARCH)  
Author: ABRAMS, ERIC BRUCE

Robert Finley

Degree: PH.D.

Year: 1997

Corporate Source/Institution: THE UNIVERSITY OF IOWA (0096)

Source: VOLUME 58/08-A OF DISSERTATION ABSTRACTS INTERNATIONAL.  
PAGE 3223. 122 PAGES

The three essays herein concern market efficiency given different mechanisms and information.

The first essay reports on market experiments which examine the effect of market segmentation. Given informationally efficient outcomes in ...

...develop a dealer market environment with informed traders and "rational" liquidity traders. Liquidity traders have price elastic demand for liquidity. Like the dealers, they update their beliefs of the security's value using Bayes' Rule and trade direction...

...dealers yield efficient outcomes; the monopolist does not. However, under certain parameterizations the perfectly competitive dealer leads to an absence of equilibrium prices whereas the monopolist remains does not.

In the final essay, I report on an experiment investigating behavior in markets with costly search. In our "Diamond" treatment buyers are randomly matched with one seller and can choose to buy from this seller or to search for a better price from another seller. Sellers are predicted to post prices equal to buyers' value; buyers are predicted to buy at this price rather than search. In our "Bertrand" treatment buyers are randomly matched with two sellers. Sellers are predicted to post prices equal to marginal cost. Again, buyers are predicted to buy at these prices rather than search. These predictions are independent of search cost size. We find that transaction prices in our Diamond treatment are significantly higher than in our Bertrand treatment. However, prices differ substantially from equilibrium predictions in both treatments. Sellers in the Diamond treatment offer a more equal division of the surplus; prices closer to...

THE EFFECTS OF CONTEXTUAL CUES ON CONSUMERS' PERCEPTIONS OF COMPARATIVE PRICE ADVERTISEMENTS (ADVERTISEMENTS, PRICE PERCEPTIONS)

The purpose of this study is to understand Korean consumers' perceptual processes induced by comparative price advertisements. While controlling for intrinsic product cue effects, this study examines the joint effects of extrinsic cues, such as comparative price (regular price /sale price), brand name, country-of-manufacture, and retailer name, on a consumer's perception of a product's price and quality.

In examining the effects of advertising contextual cues, this study incorporates consumer perceptual...

...in this area. Specially adapted theories for this study are the adaptation-level theory, the message learning theory, and the transaction

utility theory. In order to test the developed perceptual structure...

...seem to be an effective strategy.

This research contributes to an understanding of how Korean consumers react to comparative price advertisements. This study (1) clarifies which comparative price advertisement contextual cues evoke which perceptions and...

...and subsequent perceptions. In addition, this research also helps us understand how adaptation-level theory, message learning theory and transaction utility theory can be used to explain consumer price-related perceptions.

PAGE 2442. 137 PAGES

THE DECISION-MAKING PROCESS OF SMALL SPECIALTY STORE BUYERS AS RELATED TO SELECTION CRITERIA, INFORMATION SOURCES, AND STORE PERFORMANCE (RETAIL BUYING BEHAVIOR, BUYERS)

...study. The study was undertaken to examine the decision-making process of small specialty store buyers in relation to selection criteria, sources of information, and satisfaction with store performance. Objectives were to identify the relative importance placed on selection criteria and information sources by buyers for small apparel retail stores and to compare these variables with those reportedly used by buyers in previous studies. The relationship between the selection criteria and information source variables and perceived satisfaction with store performance was also examined. A sample...

...When making a purchase decision, buyers for small retail organizations placed greater importance on product-related selection criteria (as opposed to vendor-related) and personal, internal sources of information. Findings suggested that buyers for small stores exhibit more involvement with customers and vendors than has been reported for buyers in previously published literature. Small retail store buyers were more concerned with product characteristics, personal experience with vendors, and customers and salespeople as information sources; whereas their buyers in previous studies tended to place more importance on organizational objectives and less importance on personal interaction with vendors and customers. A number of selection criteria and information source variables were significantly related to satisfaction with store performance. The high satisfaction group and the low satisfaction group differed...

Detailed Description

Publication Year: 2000

Detailed Description

... For export, the product supplier advertises its product offer by providing a description of the product as in the known trading scenario. In addition, the product supplier includes a set of...

...supplier constraint.

To query, the potential customer asks a trader for a product with certain characteristics in terms of product properties. In addition, the potential customer provides a description of itself using a property sequence.

The trader checks the requirements of the potential customer, each specified as a constraint expression, against product descriptions, specified as a sequence of properties, and checks the requirements of the product supplier, specified as supplier constraints, against the customer description, specified as a sequence of properties, which the product holds. The match-making between client query and each product offer is done by evaluating each constraint expression against the related properties.

If successful, the trader returns to the potential customer one or more product offers, that is a description of each product which matched the requirements. The potential customer can then choose one of the offers, contact the product supplier and rent, buy or otherwise use the product.

DESCRIPTION OF THE DRAWINGS

Examples of the invention are depicted in the drawings and described...

...automatically facilitates an international e-commerce business transaction between a buyer and a seller of products and services by matching and linking the parties based on certain specified parameters. A first user creates a customer trading profile and second user creates a trade listing. The contents of the trading profile are compared with the contents of the trade listing. If a match is determined then a message is transmitted to the first user via e-mail. The first user is also given...

...service node. The server node identifies efficient routes which meet the requestersprime requirements and brokers sales of communication (or connect) time from the service providers to the service requesters. In a preferred embodiment the system is capable of displaying market-price information related to the supported communication routes to prospective sellers and buyers of connection time .
